

Times Tables

oV Jones

National Curriculum Requirements.

Y1 – count on and back in 2s, 5s and 10s.

Y2 – 2, 5 and 10 times tables

Y3 – 3, 4 and 8 times tables

Y4 – 6, 7, 9, 11 and 12

Y5 – Can complete all times tables mixed, at pace during lessons.

Y6 – Same as Y5 with all given words for \times and \div . Also know squared, square root, cubed, prime and composite numbers.

How do we know when they have achieved?

- 1) Multiplications in order
- 2) Out of order
- 3) Division in order
- 4) Multiplication and division at pace (5 seconds)
- 5) Multiplication and divisions using age appropriate words.

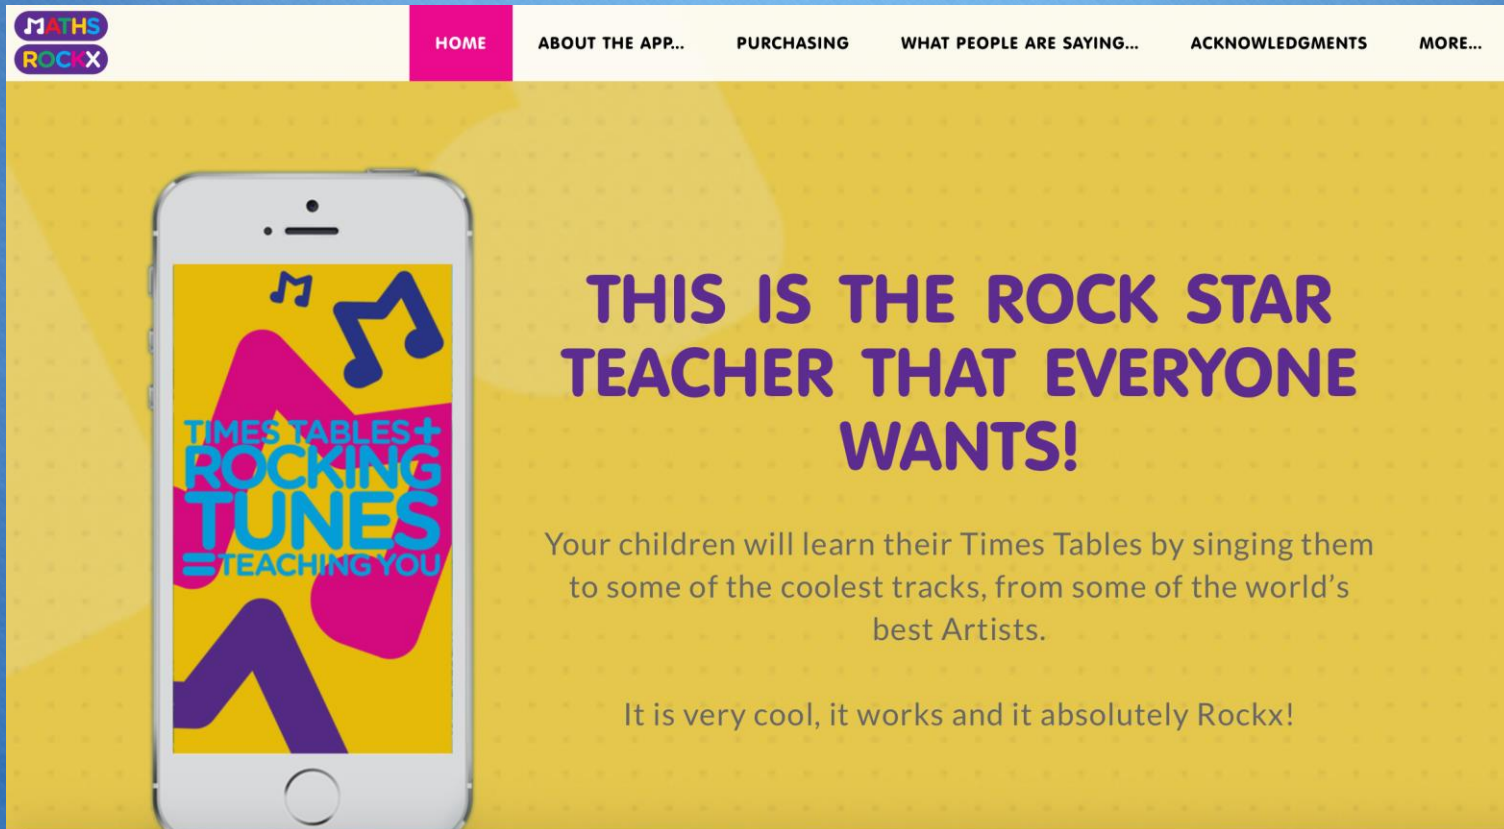

Rock Star Maths

All children have access to Rock Star maths and have their own personal logon.

Teachers have assigned them their own tables to practise and they can be found in the Garage section.

If your children like to boogie, this app is great to learn tables with!

<http://www.mathsrockx.com>

The screenshot shows the homepage of the Maths Rockx website. The header features the Maths Rockx logo on the left and a navigation menu with links: HOME, ABOUT THE APP..., PURCHASING, WHAT PEOPLE ARE SAYING..., ACKNOWLEDGMENTS, and MORE... The main content area has a yellow background with a pattern of small dots. On the left, there is a smartphone displaying the app's interface, which includes musical notes and the text "TIMES TABLES + ROCKING TUNES = TEACHING YOU". To the right of the phone, the text "THIS IS THE ROCK STAR TEACHER THAT EVERYONE WANTS!" is displayed in large, bold, purple letters. Below this, a paragraph states: "Your children will learn their Times Tables by singing them to some of the coolest tracks, from some of the world's best Artists." At the bottom, another line of text reads: "It is very cool, it works and it absolutely Rockx!"

THIS IS THE ROCK STAR TEACHER THAT EVERYONE WANTS!

Your children will learn their Times Tables by singing them to some of the coolest tracks, from some of the world's best Artists.

It is very cool, it works and it absolutely Rockx!

What we use in school.

Random Grids

Counting games - sequences

What's the missing number?

Interactive games on iPads. You can download free ones like: squeebls and bubble multiples.

A great website to use is: <http://www.multiplication.com/games/all-games>
