

Autumn

In autumn, it turns colder. It becomes windy and foggy. The days grow shorter and people wear warmer clothes.

Autumn is a colourful time of year. The leaves turn from green to yellow, red and brown. They lose the chlorophyll, which makes them green in summer.

In autumn, the crops are harvested. Festivals are held to give thanks for all the food that has been grown.

1. What happens to the weather in Autumn?

2. How do leaves change in Autumn?

3. Why are harvest festivals held?
