

The Atlantic Ocean

The Atlantic is the second biggest ocean.

There are underwater mountains in the middle. Lots of them are volcanoes. Some come above the water and make islands.

There are icebergs in the Atlantic. They sometimes sink ships. Titanic was sunk by an iceberg.

In 1492, Christopher Columbus sailed across the Atlantic. He found America.

1. What might you see in the middle of the Atlantic?

2. Why do ships need to be careful in the Atlantic?

3. Why do you think Christopher Columbus is famous?
