	EYFS	Y1/2	Y3/4	Y5/6
<p><u>Materials</u></p> <p>Blue objectives are not concept-specific but show how concepts inter-relate.</p>	<ul style="list-style-type: none"> <li>-Children know about similarities and differences in relation to places, objects, materials and living things.</li> <li>-Looks closely at similarities, differences, patterns and change.</li> <li>-Developing an understanding of growth, decay and changes over time</li> <li>-Can talk about some of the things they have observed such as natural and found objects.</li> </ul>	<ul style="list-style-type: none"> <li>-Distinguish between an object and the material from which it is made</li> <li>-Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock</li> <li>-Describe the simple physical properties of a variety of everyday materials</li> <li>-Compare and group together a variety of everyday materials on the basis of their simple physical properties.</li> <li>-Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses</li> <li>-Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.</li> </ul>	<ul style="list-style-type: none"> <li>-Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties. (Rocks)</li> <li>-Describe in simple terms how fossils are formed when things that have lived are trapped within rock. (Rocks)</li> <li>-Notice that some forces need contact between two objects, but magnetic forces can act at a distance. (Forces and magnets)</li> <li>-Compare and group materials together, according to whether they are solids, liquids or gases</li> <li>-Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)</li> <li>-Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.</li> </ul>	<ul style="list-style-type: none"> <li>-Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets</li> <li>- Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution</li> <li>-Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</li> <li>-Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic</li> <li>-Demonstrate that dissolving, mixing and changes of state are reversible changes</li> <li>-Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.</li> </ul>

	EYFS	Y1/2	Y3/4	Y5/6
<p><u>Rocks</u></p> <p>Blue objectives are not concept-specific but show how concepts inter-relate.</p>	<ul style="list-style-type: none"> <li>-Can talk about some of the things they have observed such as natural and found objects. - Developing an understanding of growth, decay and changes over time</li> <li>-Looks closely at similarities, differences, patterns and change.</li> </ul>	<ul style="list-style-type: none"> <li>-Distinguish between an object and the material from which it is made. (Everyday materials)</li> <li>- Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock. (Everyday materials)</li> <li>- Describe the simple physical properties of a variety of everyday materials. (Everyday materials)</li> <li>-Compare and group together a variety of everyday materials on the basis of their simple physical properties. (Everyday materials)</li> <li>-Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses. (Uses of everyday materials)</li> </ul>	<ul style="list-style-type: none"> <li>-Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties</li> <li>-Describe in simple terms how fossils are formed when things that have lived are trapped within rock</li> <li>-Recognise that soils are made from rocks and organic matter.</li> </ul>	<ul style="list-style-type: none"> <li>-Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago. (Evolution and inheritance)</li> </ul>

	EYFS	Y1/2	Y3/4	Y5/6
<u>Light</u>  Blue objectives are not concept-specific but show how concepts inter-relate.	-Talks about why things happen and how things work -Looks closely at similarities, differences, patterns and change.	Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. (Animals, including humans)	-Recognise that they need light in order to see things and that dark is the absence of light - Notice that light is reflected from surfaces - Recognise that light from the sun can be dangerous and that there are ways to protect their eyes -Recognise that shadows are formed when the light from a light source is blocked by an opaque object -Find patterns in the way that the size of shadows change.	-Recognise that light appears to travel in straight lines -Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye -Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes -Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

	EYFS	Y1/2	Y3/4	Y5/6
<u>Forces</u>  Blue objectives are not concept-specific but show how concepts inter-relate.	-Talks about why things happen and how things work.	- Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. (Uses of everyday materials)	-Compare how things move on different surfaces -Notice that some forces need contact between two objects, but magnetic forces can act at a distance -Observe how magnets attract or repel each other and attract some materials and not others - Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials -Describe magnets as having two poles predict whether two magnets will attract or repel each other, depending on which poles are facing.	-Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object -Identify the effects of air resistance, water resistance and friction, that act between moving surfaces -Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.

	EYFS	Y1/2	Y3/4	Y5/6
<u>Sound</u>  Blue objectives are not concept-specific but show how concepts inter-relate.	-Talks about why things happen and how things work	-Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. (Animals, including humans)	-Identify how sounds are made, associating some of them with something vibrating -Recognise that vibrations from sounds travel through a medium to the ear -Find patterns between the pitch of a sound and features of the object that produced it -Find patterns between the volume of a sound and the strength of the vibrations that produced it -Recognise that sounds get fainter as the distance from the sound source increases.	

	EYFS	Y1/2	Y3/4	Y5/6
<u>Electricity</u>  Blue objectives are not concept-specific but show how concepts inter-relate.	-Talks about why things happen and how things work.		-Identify common appliances that run on electricity -Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers - Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery - Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit -Recognise some common conductors and insulators, and associate metals with being good conductors.	-Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit -Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches -Use recognised symbols when representing a simple circuit in a diagram.

	EYFS	Y1/2	Y3/4	Y5/6
<u>Earth and Space</u>  Blue objectives are not concept-specific but show how concepts inter-relate.	-Can talk about some of the things they have observed such as plants, animals, natural and found objects. -Shows care and concern for living things and the environment. -Looks closely at similarities, differences, patterns and change. -Comments and asks questions about aspects of their familiar world such as the place where they live or the natural world	-Observe changes across the four seasons. (Seasonal changes) -Observe and describe weather associated with the seasons and how day length varies. (Seasonal changes)		-Describe the movement of the Earth, and other planets, relative to the Sun in the solar system - Describe the movement of the Moon relative to the Earth -Describe the Sun, Earth and Moon as approximately spherical bodies -Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.
	-Talks about why things happen and how things work -Developing an understanding of growth, decay and changes over time -They talk about the features of their own immediate environment and how environments might vary from
